

Alpha Peer Universes

Advancing Industry Transparency

These universes were built to have a third-party and unbiased analysis of portfolio performance and asset allocation. This interactive online tool allows users to compare their performance and asset allocation versus over 1,200 institutions.

Peer Universes that are populated by analyzing the asset allocation across 25 asset classes in order to assign each institution to 5 unique risk universes. This eliminates peer universes populated with portfolios with very different risk profiles. The result is more accurate and relevant peer universes based on asset allocation and risk metrics.

[Fifty](#) leading investment firms populating these universes with over one thousand of their institutional clients' net of all fees performance and asset allocation across 25 asset classes. An unparalleled amount of valuable data for a fraction of the price of other peer universes in the market.

Benchmarking: Compare performance and asset allocation across different client types.

Risk: Use five prebuilt risk profiles to build more relevant Peer Universes. The first tool for apples-to-apples comparisons.

Size: Drilldown into similar size institutions to have more granular data.

Asset Allocation: Only peer universe with uniform asset class metrics.

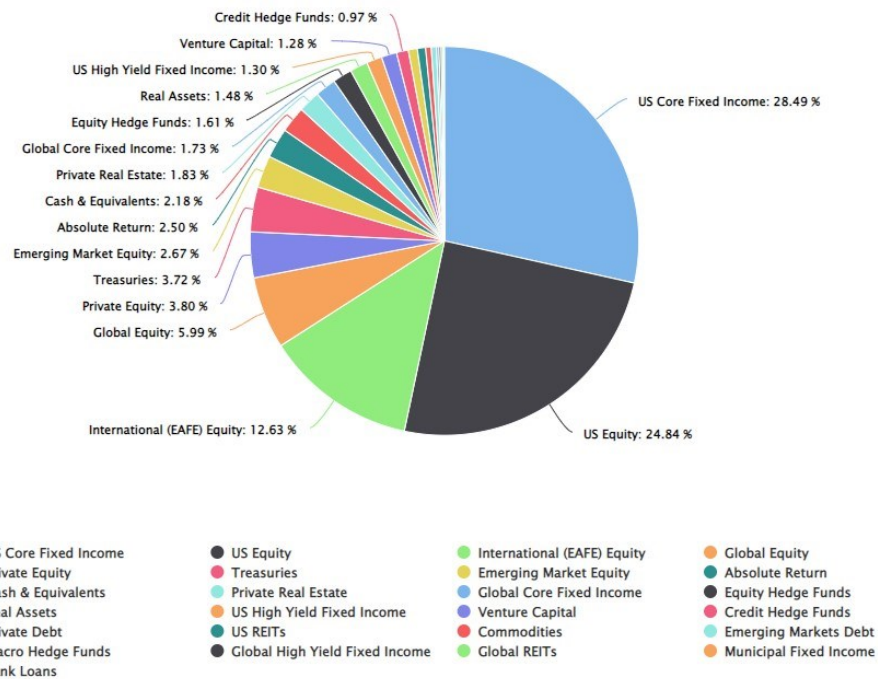

Performance: Analyze net of all fees performance to get bottom-line results.
